Our Mission

Studies show a strong connection between physical well-being and academic success. To that end, the mission of the Student Health Service at Northeastern Illinois University is to provide a wide array of wellness, illness, and health promotion services for our students.

Services

All students pay a Student Health Service fee; this covers all services, tests, medications, information, and materials provided by the Student Health Service. The *one exception* to this is contraception; there is a minimal charge for the oral contraceptives we have available, although condoms are free.

The nurse practitioner provides full gynecological care as well as STD testing. She takes appointments Monday - Thursday during the fall and spring semesters; two days a week during summer.

The nurses provide assessment, treatment, and follow-up for a wide range of complaints and problems. Use us as your first line of care; we may refer you to your physician if the situation cannot be fully dealt with in the Student Health Service office.

We have a wide assortment of brochures and visual displays in the Student Health Service office. Many are out in the hallway for easy access. Come in and see what else we have that may interest you. You can use the brochures as class handouts or the displays for class projects.

Stress Buster:

During finals week in the fall and spring, we sponsor a "Student Stress-Free Zone". A room becomes a soothing place to play a game, color, have pizza, watch a video, and get a chair massage. We invite you to join us and relax during a hectic week.
